

## 3 way and 2 way foley catheter (100% Silicone)

### 100% Silicone 3-Way Foley Catheter with X-ray Contrast Line

- CE Certification
- Universal urine drainage port of the catheter compatible with standard urine bag connectors
- Additional port for bladder irrigation
- Made of soft and flexible silicone, resistant to twisting and bending
- Atraumatic, soft rounded tip, specially designed to facilitate catheter insertion into the bladder
- Tip with two lateral eyes with smooth edges
- Silicone surface allowing atraumatic insertion of the catheter
- Radiopaque line along the entire length of the catheter
- Easy to fill and empty, tear-resistant balloon
- Plastic valve to ensure balloon tightness
- Phthalate-free, latex-free
- Single-use
- Sterilized with ethylene oxide
- Packaging: 1 pc./double packaging: internal - foil, external - paper-foil

Reference	Length	Balloon Size	Color
CFNS-3D-16-30-P	400 mm	30 ml	orange
CFNS-3D-18-30-P	400 mm	30 ml	red
CFNS-3D-20-30-P	400 mm	30 ml	yellow
CFNS-3D-22-30-P	400 mm	30 ml	purple
CFNS-3D-24-30-P	400 mm	30 ml	dark blue

# 100% Silicone 2-Way Foley Catheter with Radiopaque Line

- Made of soft and flexible silicone, this catheter reduces allergic reactions and improves patient comfort.
- The rounded, non-traumatic tip of the catheter is optimized for easy insertion into the bladder.
- Features two lateral eyes with softened edges for effective drainage.
- The universal drainage port of the catheter is compatible with standard urine bag connectors.
- The silicone coating of the catheter ensures a gentle and secure insertion.
- Equipped with a radiopaque line along its entire length for visual control under radiation.
- The tear-resistant balloon can be easily filled and emptied and is available in various capacities.
- A plastic valve maintains the tightness of the catheter's balloon.
- Sizes CH 6, CH 8, CH 10 are equipped with a nylon guide, simplifying catheterization.
- A catheter cap is packaged separately, ensuring enhanced hygiene.
- Designed without phthalates or latex for maximum compatibility with patients.
- Intended for single use to ensure hygiene and safety during procedures.
- Sterilized with ethylene oxide to ensure complete asepsis.
- Individually packaged in a double packaging: an internal foil envelope and an external paper-foil.

Reference	Length	Balloon Size	Color
CFNS-2D-06-03-P	310 mm	3 ml	pink
CFNS-2D-08-05-P	310 mm	3-5 ml	black
CFNS-2D-10-05-P	310 mm	3-5 ml	grey
CFNS-2D-12-10-P	400 mm	5-10 ml	white
CFNS-2D-14-10-P	400 mm	5-10 ml	green
CFNS-2D-16-10-P	400 mm	5-10 ml	orange
CFNS-2D-18-10-P	400 mm	5-10 ml	red
CFNS-2D-20-10-P	400 mm	5-10 ml	yellow
CFNS-2D-22-10-P	400 mm	5-10 ml	purple
CFNS-2D-24-10-P	400 mm	5-10 ml	dark blue

# 100% Silicone Foley Urinary Catheter

The use of a Foley catheter is essential for effective long-term urinary drainage management. Our catheter, made from soft and flexible silicone, is designed to offer a comfortable and secure insertion. It features a non-traumatic, rounded tip that facilitates insertion while minimizing the risk of mucosal irritation.

This catheter has a universal drainage port, compatible with standard urine bag connectors, allowing for easy integration into various medical care environments. It also features a radiopaque line along its entire length, ensuring easy monitoring under X-rays.

**CE certified** and designed without latex or phthalates, our Foley catheter is ideal for sensitive patients, thereby reducing the risk of allergic reactions. It is sterilized with ethylene oxide, ensuring safe use in compliance with the strictest hygiene standards.

Available in specific models for both men and women, this catheter precisely meets the individual needs of each patient.

Individually packaged in double packaging to maintain sterility until use, our Foley catheter is a reliable solution for healthcare professionals, ensuring optimal management of urinary drainage in a medical setting.
